WHAT IS CRYPTOCURRENCY TRADING?

Cryptocurrency trading is the process of buying and selling digital currencies in order to profit from price movements in the market.

Unlike traditional currencies, cryptocurrencies operate on decentralized blockchain technology, allowing transactions to occur securely without the need for banks or central authorities.

HOW CRYPTOCURRENCY TRADING WORKS

- 

1 MARKET ANALYSIS

Traders analyze market trends, price charts, trading volumes, and news events to identify potential opportunities.
- 

2 BUY OR SELL DECISION

Based on market analysis, traders decide whether to:

 - Buy (Long Position) when expecting prices to rise.
 - Sell (Short Position) when expecting prices to fall.
- 

3 TRADE EXECUTION

Orders are placed through a cryptocurrency exchange or trading platform where buyers and sellers interact.
- 

4 PROFIT GENERATION

Profits are earned by taking advantage of price fluctuations in the cryptocurrency market.
